

S-01

CLAIM: Raster pages require OCR before text-level reference checks.

CONCEPT: OCR dependency

REASONING: A raster image has pixels but no native character sequence for passage matching.

LIMITATION: OCR can confuse characters and page layout.

PRINTED PAGE: SCAN-1

S-02

CLAIM: OCR-derived quotations require lower confidence than native text.

CONCEPT: OCR uncertainty

REASONING: Recognition errors can alter exact wording even when the visible page is unchanged.

LIMITATION: Manual review may still be required for critical quotations.

PRINTED PAGE: SCAN-2
